

“Let’s go invent tomorrow instead of worrying about what happened yesterday.”

-Steve Jobs

IT ASSOCIATION

Information Technology (IT) plays a notable role in modern communication, business information and data management. Having proven its worth, IT is now trusted with the most important and crucial tasks. Overall, IT has become the backbone of our world enabling the most extreme tasks of human requirement and going beyond the imagination of common man.

Here, the I. T. Association works tirelessly with the same zeal and provides much needed digital assistance in our institution’s competitions all around the year. Under the wonderful guidance of our Chairperson, Mr. Chandan Kumar Mishra and other teachers of Computer Science, Mr. Wayne K. Gardner, Mrs. Anamika Frederick, Mrs. Shabana Y. James and Mr. Jude Augustine Joy Peter, we provide our students a platform to showcase their skills and interests in IT sector.

Our first event was the auspicious Teachers’ Day where we made a video presentation to showcase the hard work and commitment of our teachers in shaping our minds while giving us a loving environment to study and enjoy.

Following the celebration, we conducted a Video Editing Competition for classes 11th and 12th on the theme “Beauty of Nature” and “Cultures of India” on 11th September, a PowerPoint Presentation Competition for classes 6th to 8th on the topic “Patriotism in Daily Life” on 12th September. These

events provided the students with a platform and an opportunity to present their talents in a healthy competition. The events were a grand success thanks to the hardworking office bearers of the IT Association and our Chairman along with the support staff.

Next up was the most awaited event of the whole year, Cultural Fest Josephest, which was organised on 25th and 26th October. The IT Association sided the competition with the technical side overcoming every obstacle. We created three videos first, the opening of day one, second the opening of day two and the third being Life at SJC presenting the audience with a brief view of how SJC brings out the best in its students with the cooperation of the collage cabinet. “Life at SJC” was a grand success. We also created numerous PowerPoint presentations that made the working of the competitions easier and smoother for both the audience and participants.

Finally, I would like to express my gratitude to the Chairperson, Mr. Chandan Kumar Mishra and other teachers of Computer Science, Mr. Wayne K. Gardner, Mrs. Anamika Frederick, Mrs. Shabana Y. James and Mr. Jude Augustine Joy Peter. I would even thank Devansh Ranjan and Harsh Agrawal for their constant technical support. I extend a special thanks to all the members of the I. T. office bearers who worked tirelessly in school as well as at home to make all the events a grand success.

In conclusion, I would like to say, technology is a wonderful tool with the power to harmonise and advance the human interests to create a better tomorrow.
