

# Science Association

"The important thing is not to stop questioning. Curiosity has its own reason for existing."

~Albert Einstein

The Science Association has been providing a platform to all the students who want to express their originality, innovation, concerns and concepts, individually and as a group, which can in turn not only enhance their intellectuality but also boosts their confrontational skills and it gives them the confidence to take a stance and truly express what they believe in, which is in consonance with our motto, "For the Ignited Minds".

Fatigued by organising the same event twice in a row, this year, the Association decided organised a Research Paper Writing competition called "Aventia", which was an immense success. This event helped the students multi-laterally with developing a sense of research methodology, their writing skills and oratory prowess. Inculcating these skills this early will provide Josephites with an edge over their peers when they pursue higher education.

The event was inaugurated by our esteemed Principal, Rev. Fr. Walter D'Silva, whose constant encouragement and support played a pivotal role in its success. The presentations were well-curated, highlighting the diligence and hard work of the students in researching and presenting topics from a wide array of scientific disciplines. The papers were well-curated, highlighting the diligence and hard work of the students in researching and presenting topics from a wide array of scientific disciplines. The participants wrote prodigious papers and presented them with great intrepidity, demonstrating not only their knowledge but also their critical thinking and analytical skills. Each presentation was followed by a question-answer session, where the

panel of expert adjudicators engaged in meaningful discussions with the participants.

We would like to thank the students who participated in Aventia, for their efforts and enthusiasm. We hope that they have learned from our avant-garde initiative and we sincerely hope it instilled and bolstered a spirit of learning and healthy competition in them.

The Science Association is headed by a team of dedicated and brilliant office bearers under the guidance of our esteemed Chairperson, Dr Sheetal Sebastian, who has worked tirelessly to ensure the smooth conduct of the event.

To conclude, a great deal of heartfelt effort has been put forth for the enrichment of this fine organisation and we hope the same continues for future generations to follow. It has been an honour for the entire team to get an opportunity to contribute to the association and school on the whole.

Chairperson:	Dr Sheetal Sebastian
President:	Lakshya Kulshrestha
Vice President:	Devansh Mishra
General Secretary:	Utkarsh Dwivedi
Organising Secretary:	Shreyansh Singh
Treasurer:	Panav Tandon
